TITLE : SHEET HAVING LAYER CONTAINING
OILY COMPONENT AND PRODUCT
USING THE SHEET

ABSTRACT : PROBLEM TO BE SOLVED: To provide a sheet capable of efficiently and reliably transferring a liquid or a semisolid oily component to an intended position of the skin.

SOLUTION: In a sheet having a layer 50 of a mixture of (a) a liquid or a semisolid oily component of 25°C and (b) an ester compound formed of dextrin and a fatty acid, the oily component (a) is gelated by an ester compound (b) and fixed onto the sheet. In a diaper 1 in which the sheet is used as a top sheet 10, the oily component (a) moves to the skin of a wearer during use, forms an oily film on the skin and protects the skin.
